Subject: Outcome of Second Study on Impact of Pressure Cookers on LPG Consumption

Dear Mr. Rahman,

The purpose of this communication is to formally apprise your esteemed office of the outcomes derived from the second study conducted on the impact of pressure cookers on LPG consumption as presented to you on 1 April at your office and suggest a revised refill cycle for the LPG distribution.

Based on the findings of the study, UNHCR intends to modify its refill cycle by establishing a distinct refill schedule tailored to each household size, thereby enhancing targeting. The revised refill schedule, outlined below, is informed by the aforementioned pressure cooker study and the observed LPG consumption patterns at the household level.

Current and proposed new LPG refill cycle

HH Size	Current Refill Cycle (days)	New Refill Cycle (days)
1	49	52
2	49	52
3	49	47
4	43	45
5	43	43
6	38	39
7	38	36
8	32	33
9	32	31
10	26	28
11	26	27
12+	23	25

Mr. Mohammed Mizanur Rahman
Additional Secretary
Refugee Relief and Repatriation Commissioner

On behalf of UNHCR Bangladesh, I thank you for the continued support to the Rohingya response in and for the close cooperation between the Government of Bangladesh and UNHCR.

Yours sincerely,

Yoko Akasaka
Head of Operations
